

GREEN SAWDUST GASIFIER

HIGHEST OUTPUT, CLEANEST BURNING SYSTEMS IN THE INDUSTRY

- Heavy duty designs provide long term service
- Our combustion air design allows for operation at up to 56% fuel moisture content
- Bridge wall design separates the sawdust from the rear of the gasifier wall reducing carryover
- Our latest design incorporates a dual stack option for quick restarts and quick exhausting of combustion gases
- Automatic process control for hands-free operation
- Offer fuel delivery and material handling systems
- Safe burner idling and restarts utilizing industry first automatic, fully shielded safety door eliminating the need to have staff burner open doors
