

# GREEN SAWDUST GASIFIERS

Highest output, cleanest burning systems in the industry

## Green Sawdust Gasifiers Features and Benefits:

- Heavy duty designs provide long term service.
- Our combustion air design allows for operation at up to 56% fuel moisture content.
- Bridge wall design separates the sawdust from the rear of the burner wall greatly increasing combustion volume.
- Our latest design incorporates a dual stack option for quick restarts and quick exhausting of combustion gasses.
- Full PLC control of the combustion system provides safe, reliable operation.
- Fuel delivery systems available.
- Safe burner idling and restarts utilizing industry first automatic, fully shielded safety door.
