

KDS Windsor

INDUSTRIAL MECHANICAL GROUP

COMPANY HISTORY

Fan & Blower Installation

- New system installations
- Aftermarket fan replacements
- Supply and installation of adjacent ductwork and flex connectors

Fabrication & Welding Services

- Custom metal fabrication
- Sheet metal work
- On-site welding and repairs
- Design and drawing creation

Refractory Ductwork

- Design, fabrication, and installation of refractory-lined ductwork
- Repairs and maintenance for refractory systems

Mechanical & Pneumatic Conveying

- Supply and installation of belt, screw, chain, and bucket conveyors
- Design and installation of surge bins and storage equipment
- Design, manufacturing, and installation of high- and low-pressure pneumatic conveying systems

Air & Emissions Control Systems

- Installation of package dust collectors and scrubbers
- Regenerative Thermal Oxidizers (RTOs)
- Other mechanical air filtration and emissions control systems

Dampers & Flex Connectors

- Design, manufacturing, and installation of mechanical, pneumatic, and hydraulic dampers
- Custom flex connectors
- Isolation dampers

And More... Don't see it on the list? Let's talk, KDS is ready to help. Contact us today.

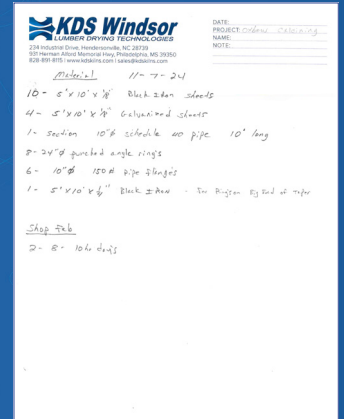

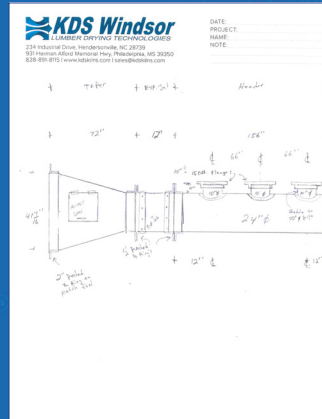

KDS Windsor takes safety, quality, and expertise seriously. We are proud to hold an AWS Certified Welding Inspector (CWI) certification, ensuring the highest welding standards across our projects. Additionally, our team is NCCCO Rigging Certified, demonstrating our commitment to safe and efficient material handling.

We also prioritize workplace safety with MEWPs (Mobile Elevating Work Platforms) certification, equipping our team with the skills to operate aerial lifts safely and effectively. Every Foreman at KDS Windsor holds an OSHA 10 certification, while all Supervisors have completed OSHA 30 training, reinforcing our dedication to maintaining a safe and compliant work environment.

With these industry-leading certifications, KDS Windsor ensures top-tier quality, safety, and professionalism in every project we undertake.

At KDS Windsor, getting custom work is quick and easy. From design to installation, our streamlined process ensures you get the right solution—fast. Just share your needs, approve the design, and we'll handle the rest!

Connect with Us

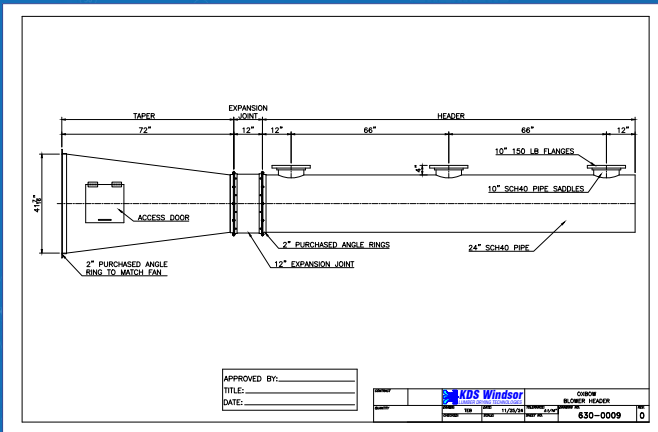

Reach out at 828-891-8115 or sales@kdskilns.com to share the details.

1

Conceptualize and Quote

We create initial sketches, suggest optimal materials, and provide a detailed quote for your approval.

2

Design and Approval

Upon your order, we develop precise drawings for final confirmation.

3

Produce and Install

We manufacture the custom ductwork and offer professional installation services if needed.

4

Capabilities: We offer custom ductwork in steel, painted steel, stainless steel, and aluminum, starting at 16 gauge thickness. Refractory-lined options provide added insulation and heat protection for high-temperature applications.

We deliver expert solutions in fabrication, welding, damper manufacturing, refractory installation, conveying system servicing, and fan/blower installation. With a commitment to quality and innovation, we provide reliable, customized solutions to meet your operational needs.

CONVEYING SYSTEM SERVICING

FABRICATION & WELDING SERVICES

DAMPER SERVICE & MANUFACTURING

REFRACTORY SERVICE & INSTALLATION

FAN & BLOWER INSTALLATION

BEFORE & AFTER

REBUILT

REPLACED:

- ① Decking
- ② Overhead Baffles
- ③ Brush Baffles
- ④ Columns
- ⑤ Divider Walls & Doors
- ⑥ Vertical Baffles
- ⑦ Column Bases
